Noise Cancelling: 70% Passive
Playtime: 8+ hours

WHAT'S IN THE BOX?

1. Lunatune Wireless Headphones
2. Micro-USB charging cable
3. AUX Cable

HOW TO WIRELESSLY PAIR TO YOUR MOBILE DEVICE/ MUSIC PLAYER

1. Press and hold down the power button *(Figure 1.6)* for three seconds to turn on/off.

2. Once powered on, you'll hear four ascending tones and the Lunatune will automatically go into wireless pairing mode. During this device scanning mode, you'll see the LED indicator *(Figure 1.4)* flash red and blue.

3. Find and select "Lunatune" in your device's wireless pairing setting.

4. Once the device is successfully connected, you'll hear another tone and the LED indicator should flash blue.

5. To connect to a new device, first turn off the Lunatune. Hold down the power button for 6 seconds until you hear the "power on" sound, then two beeps. The LED indicator lights should now flash red and blue. This means the Lunatune has forgotten the previously paired device and is now scanning for a new device to pair with.

HELPFUL TIPS / SAFETY POINTERS

- Lunatune will automatically turn off if no devices are paired within 13 minutes of turning on.

- If Lunatune doesn't appear on your wireless pairing settings the first time, try again in a less crowded area.

- You will see a red light glow on the LED indicator while the headphones are charging. Once the unit is fully charged, the light will turn off.

- The headphone control buttons will not work if your device is connected via wired AUX cable.

- If the Lunatune has trouble charging or holding charge, try using another universal Micro-USB cable.

- Keep the Lunatune dry, and do not store or use in an extreme hot or cold environment.

- Do not disassemble, modify, or alter this product in any way. Doing so may cause undesirable effects such as electric shock, product malfunction, or fire hazards. Not to mention, it'll void your warranty.

- In case of abnormal behavior, discontinue use.
